

THE FACE OF **MOHS SURGERY**

The Dermatologic Surgery Center of Washington

5530 Wisconsin Avenue, Suite 820, Chevy Chase, MD 20815 | 301.652.8081

Dr. Maral Kibarian Skelsey is nationally recognized as a skin cancer specialist and expert in Mohs Micrographic Surgery, the most advanced and effective treatment for the two most prevalent kinds of skin cancer: basal cell and squamous cell carcinoma.

Dr. Skelsey is a Fellow of the American College of Mohs Surgery and Director of Dermatologic Surgery and Clinical Associate Professor of Dermatology at Georgetown University. Her practice, The Dermatologic Surgery Center of Washington, is

focused on state-of-the-art detection and treatment of skin cancer with careful attention to the cosmetic outcome.

Dr. Skelsey's training in dermatology, pathology and reconstructive surgery allows her to preserve natural appearance following cancer surgery. Her skill as a physician is complemented by her compassion for her patients. She is known for her concern for healing the whole person, thoroughly reviewing treatment history while explaining all options and answering questions.
