

A black and white portrait of Dr. D. Gordon Rye, DDS, an older man with short, light-colored hair, smiling warmly. He is wearing a light-colored dress shirt and a dark, patterned necktie. The background is dark and out of focus.

THE FACE OF TMJ DENTISTRY

Dr. D. Gordon Rye, DDS

10614 Warwick Avenue, Fairfax, VA 22030 | 703.352.2010

Approximately one third of the population suffers from some level of TMJ disorder. Many who suffer with headaches, chronic neck or facial pain or even ringing in the ears do not know their bite and temporomandibular joint (TMJ) are the source of their pain. They needlessly suffer for years. The TMJ is the most complex joint in the body, yet only about 10% of dentists have received any postdoctoral training in the diagnosis and treatment of TMJ disorders. Dr. Rye is highly trained in the latest

dental neuromuscular technologies and advances for diagnosis and treatment of the TMJ. Depending on the severity of the problem, there are several treatment options available. Dr. Rye knows what treatments work best. He treats the causes of the pain, while other dentists may just manage the symptoms. Dr. Rye's results are often immediate, dramatic, and life-changing. If you suffer from TMJ pain, contact Dr. Rye for a consultation. You can read and watch patient testimonials at ryesmilesforlife.com.
